

Underhill Turfspy Glasses (Purple) Turf/Plant/Tree Stress Detection Glasses - Shatter Proof Polycarbonate Safety Lens w/Case

RNG650-01

Details

See turf stress 2-10 days before it's visible to the naked eye! Spot potential turf diseases such as pythium, poa grass, and yellow patch before a serious problem arises. Broken or under-performing sprinklers are easily detected, as well as high traffic activity and early weed growth. Attractive wrap-around glasses with adjustable nosepiece features shatter-proof purple polycarbonate safety lens. Protective case included. Ideal for golf courses, sports fields, sod farms and large turf areas.
