

Underhill Mirage M-115 Sprinklers

RGM115-P-

Details

For larger synthetic or natural turf areas where irrigation must be installed within the playing area, M-115 sprinklers cover a lot of ground (115 ft / 35 m radius) and pull a disappearing act when not in use. This very impressive long throw sprinkler is noted for the extra-large deep "sod cup" cover which holds a 9" (220 mm) diameter section of natural grass. It is virtually invisible when not in use, allowing the nearly seamless playing surface protection for athletes and mowers, as well as, prevention against vandalism. Full/part circle (360/30-330 degree) arc, electric valve-in-head, 1-1/2" inlet, 9" pop-up sod cup, 115 ft. (35 m) radius @ 108 GPM max capacity, impact drive. Installed with a 22 degree trajectory nozzle plus one nozzle of your choice shown below.

Specifications

Manufacturer	Underhill
