

24" Smart Out of Bounds/Hazard Markers

RP05224

Details

Place reflective out-of-bounds Markers in the ground to measure distance to hazard areas such as bunkers, water, or out-of-bounds areas using the rangefinder. These recycled lumber 2" X 2" stakes with spike base contain laser prisms for reflectivity. For fun, place stakes on the tees for golfers to measure back to the tee from their existing position.
