

Corona Heavy Duty Weeding Hoe - 7in

RCSH63000

Details

Get the weeding done in half the time and avoid stooping and backache with the Corona Weeding Hoe featuring a 7in (23.5cm) head and 60in polished handle. The wide winged head features a notched and sharpened blade of abrasion-resistant steel and cuts on both the push and pull strokes. The head moves horizontally just below the surface with minimal soil disturbance. Slices easily through fibrous overgrown weeds such as thistles, bindweed, wild mustard and clumping grass. Results are reduced weed germination and better moisture retention in the soil. 60in handle, 7in blade.
